SECTION 2 – INSTRUCTIONS TO BIDDERS

2.01 Scope of Services

The services to be provided under this bid request consist of the collection and transportation of residential solid waste, recyclable materials, and bulk waste from approximately 5,044 residential properties within the Township of Salisbury, Lehigh County, Pennsylvania to a solid waste disposal facility and recycling processing facility of the Successful Bidder's choice.

2.02 Description of Bids Requested

A. Primary Bid:

The Primary Bid shall be based on curbside collection, transportation and disposal from approximately 5,044 residential properties on a per unit/per year basis as follows:

1. Residential solid waste once each week in each year of the contract.
2. Comingled recyclable materials collection once each week in each year of the contract.
3. Bulk waste collection once each week in each year of the contract.
4. A contract term of three (3) years, with the option to extend the contract for up to two (2) additional one (1) year periods.

B. Alternate Bid:

The Alternate Bid shall be based on curbside collection, transportation and disposal from as many of the Township's approximately 5,044 residential properties as possible on a per unit/per year basis as follows:

1. Residential solid waste once each week in each year of the contract.
2. Comingled recyclable materials collection once each week in each year of the contract.
3. Bulk waste collection once each week in each year of the contract.
4. A contract term of three (3) years, with the option to extend the contract for up to two (2) additional one (1) year periods.

The Alternate Bid shall be based on cart-only collection of residential solid waste and recycling materials from as many of the Township's approximately 5,044 residential properties as possible, utilizing an automated collection system consisting of a single operator, side-loading trash or recycling collection vehicle that uses a mechanical arm to lift a trash or recycling container and deposit the trash or recycling materials directly into the

body of the collection vehicle, and the collection, transportation and disposal of bulk items from these same properties using traditional collection methods and not using an automated collection system. The viability of the actual number of residential properties able to be serviced by automated collection is to be assessed and determined by the Successful Bidder.

The Alternate Bid shall also include the collection, transportation and disposal of residential solid waste, recycling materials, and bulk items from the remaining residential properties using traditional (manual) collection methods and not utilizing an automated collection system. Again, the determination of the number of residential properties requiring traditional (manual) collection shall be assessed by the Successful Bidder.

If the Alternate Bid is awarded, the Successful Bidder shall purchase, maintain, and deliver during the term of the contract, one ninety-six (96) gallon wheeled trash container and one sixty-five (65) gallon wheeled recycling container to each of the residential units being serviced with the automated collection system. The differing color of the lids shall easily distinguish the purpose of the containers, in addition to the size.

A second ninety-six (96) gallon wheeled trash container shall be made available to any individual residential property owner upon request. Each residential property owner requesting a second ninety-six (96) gallon wheeled container shall be responsible for the cost of the container which shall not exceed the Successful Bidder's cost plus ten (10%) percent. The Successful Bidder shall invoice the resident directly for the cost of the second container.

A sixty-five (65) gallon wheeled trash container, instead of the initially issued ninety-six (96) gallon wheeled trash container, shall be made available to any individual resident upon request who does not want, cannot use or manage, or does not produce enough residential solid waste to fill a ninety-six (96) gallon wheeled container each week. The color of the lid for the sixty-five (65) gallon trash container shall be consistent with that of the ninety-six (96) gallon trash container.

All wheeled containers must be clean and deodorized prior to delivery. Any damaged wheeled trash containers provided by the Successful Bidder shall be repaired or replaced by the Successful Bidder, and delivered to the resident within 48-hours after being reported to the Successful Bidder.

C. Roll-off Container Unit Price

It shall be assumed that the Township may utilize roll-off container service at any time during the life of the contract, and shall not be limited or restricted as to quantity or location of roll-off container service other than the unit price submitted with the bid.

2.03 Bulk Item Collection

Bulk Waste shall be collected curbside on days designated for residential solid waste collection. There is a limit of one such item per residential property per week. Bulk waste shall be disposed of in the same manner as residential solid waste.
